INTRODUCTION

The progress of science, technology, and national developments requires high-quality human beings, both in knowledge and in practice. Moreover, improving the quality of human resources will ensure the continuity of science and technology developments in increasingly diverse and complex interrelationships between scientific disciplines. Therefore, the contribution of unparalleled professional expertise for national development and the ability to keep up with the pace of change in science and technology is perceived as an increasingly urgent demand in all fields, including the pharmaceutical sector.

The Faculty of Pharmacy UGM, as one of the most experienced pharmaceutical schools in Indonesia, seeks to contribute to improving intellectual abilities in the pharmaceutical sector through excellent education, innovative research, and extensive networks to create graduates who can manage change, promote innovation, and are competent according to science and technology development. To accomplish these goals, the Faculty of Pharmacy UGM has established a Postgraduate Program, namely the Master in Pharmaceutical Science Study Program.

The Master in Pharmaceutical Science Study Program has been accredited A according to the Decree of LAM-PTKes No. 0408/LAM-PTKes/Akr/Mag/XI/2020

OBJECTIVE

The Master in Pharmaceutical Science Study Program aims to create graduates who master competencies in drug discovery and its properties, both natural and synthetic drugs; pharmaceutical manufacturing and quality analysis according to the expected effects; as well as the development of various methods of food and drug quality control chemically, microbiologically and biologically.
